Long-Read Amplicon Sequencing on the GS FLX+ System

Come see what's new with the GS FLX+ System and chemistry!

The Georgia Genomics Facility

is hosting a seminar featuring Shelly Thompson and My-Hanh Nguyen of Roche Sequencing Solutions who will introduce the applications and features of the **new GS FLX+ version 2.9 software**.

Wednesday, September 18, 2013

1:00 pm - 3:00 pm

Coverdell Room S175

Following the seminar, from 3:00 pm - 4:00 pm, Shelly and My-Hanh will be available to consult with you on your specific applications.

**For life science research only.
Not for use in diagnostic procedures.**

Seminar Sequencing Services Special!

For a limited time, GGF is offering an exceptional savings opportunity for our customers. For the first 8 sequencing runs completed between now and November 9, 2013, the following prices will be in effect:

- **\$3,315 for a 454 Sequencing system half run**
(includes one library prep and one titration)
- **\$3,960 for a 454 Sequencing system full run**
(includes one library prep and one titration)
- **\$300 per additional library**
- **\$600 per additional titration**

For more information and to take advantage of these savings on 454 long-read sequencing technology, please e-mail
